## WORK EXPERIENCE

### Senior Software Engineer Atypn Systems

11/2020 - Present

AMMAN, JORDAN

#### Responsibilities/ Achievements

- Responsible for hardcore/ complex code revamping/ rewriting activities.
- Provided strong support and reference for other mid/ senior engineers.
- Conducting technical interviews for all levels.
- Been the technical lead on one of the significant engineering tribe.
- Providing technical training sessions internally/ externally.
- Pushing other engineers out of their comfort zone to learn and grow in many ways.
- I used to wear multiple hats and have to do work that other teams should handle to ensure fast delivery, high-security standards, and best compatibility.
- Worked with people across 6 different time zones around the world (USA, Australia, Canada, UK, Greece, and Jordan)
- Tech stack: React, Nodejs, Nestjs, Webpack, Pug, Typescript, Groovy, Java, Spring, Docker, Kubernetes, AWS, Python, Selenium, Tensorflow, GraphQL, Jenkins.

### Full Stack Developer Realsoft Advanced Application

03/2019 - 11/2020

Amman, Jordan

#### Responsibilities/ Achievements

- Playing a key role in the product team and guide/ train junior-level engineers.
- Was the "Go To" engineer whenever someone is stuck and needed support on their tasks.
- Responsible for hardcore/ complex code revamping/ rewriting activities.
- Leading the development process in some parts of the product.

## EDUCATION

### Computer Engineering University Of Jordan

01/2016 - 03/2020

*I dropped out of college in my 4th year of study cause I couldn't find interest in this major since it was focused on electrical engineering*

## SKILLS

HTML CSS SCSS Javascript

TypeScript React React SSR AWS

Angular Nodejs Webpack Babel

Compilers /Code Modes Docker Kubernetes

GraphQL Jenkins NestJS JAVA

JAVA EE Jquery SQL Wordpress

MongoDB PUG Python

Unit Testing - Jest/ Junit Web Accessibility

Web Performance

## PORTFOLIO

### Al Khawarizmi: Advanced Data Collection Solution

*A complete solution from building your survey with advanced features(page builder & design) to publishing it across different platforms (web/ tablet). I could say it's similar to survey monkey but with 3x the features (A full featured page builder, dynamic db tables generation based on user's data model preference, public data collection support with tablets and location tracking) more info can be found here -> <https://youtu.be/rEpDovUC7rw>*

### Science.org

*An award winning redesign on one the biggest journals' website*

### Journal Sites

*I've also worked on building the UI for a couple of other big journals: PNAS.org - journals.asm.org - facetsjournal.com - cabidigitallibrary.org*

### Syde Tasker

*A Market place for people to offer their microservices for cash. Tech Stack: React - React Native - nodejs - sequelize - mysql - algolia - s3 - cloudfront - ec2 - lambda*

### Teams Lounge

*A social media app that connects people together by their interest to work on a certain project, It also provides project management capabilities. Tech Stack: Angular, Nodejs, Dynamodb, S3, Lambda, Cognito, Route53, API Gateway, Elastic Search*

## LANGUAGES

English  
Full Professional Proficiency

Arabic  
Native or Bilingual Proficiency

## INTERESTS

Open Source

Generative Deep Learning
